## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

*General Election Data for the United States, 1950-1990*

*– National, 1990*

- 1) Collection Update:** The SPSS setup files were updated to conform to current standards. SAS and Stata setup files, as well as SPSS and Stata system files, a SAS transport (CPORT) file, an R data file, a tab-delimited data file, and a PDF codebook have been added to the collection.
- 2) Column Locations:** The column locations provided in the “Original ICPSR Codebook, 1995 Release” may no longer be applicable to the ICPSR version of the data file. The correct column locations for the ICPSR data can be found in the SPSS and SAS setup files, and in the Stata dictionary file.

GENERAL ELECTION DATA FOR THE U.S.: PART 16  
(ICPSR 0013)

INTRODUCTION

The Inter-university Consortium for Political and Social Research has prepared historical election data for the years from 1788-1990. This collection consists of several discrete datasets; the two major files are United States Historical Election Returns, 1788-1968 (ICPSR 0001) and General Election Data for the United States, 1950-1990 (ICPSR 0013). United States Historical Election Returns, 1788-1968 (ICPSR 0001) contains county-level returns for over ninety percent of all elections to the offices of president, governor, United States representative from 1824-1968, and United States Senator from 1912-1968. Returns for approximately two-thirds of all elections to the offices of president, governor, and United States representative in the 1788-1823 period also are included. The collection of historical election returns by ICPSR was facilitated by grants from the National Science Foundation and the National Endowment for the Humanities.

General Election Data for the United States, 1950-1990 (ICPSR 0013) contains county-level returns for all elections to the same national and state offices, plus one additional state-wide office (usually attorney general or secretary of state).

A third data file, Candidate Name and Constituency Totals, 1788-1990 (ICPSR 0002), contains summary information about each of the candidates contesting elections in the United States over this period of nearly two centuries, while more detailed information about the candidates and contests can be found in a fourth file, Candidate and Constituency Statistics of Elections in the United States, 1788-1990 (ICPSR 7757).

The file described below, General Election Data for the United States, 1950-1990: PART 16, National, 1990 contains returns for the offices of president, United States senator, United States representative, governor, and one additional state-wide office for all counties in the United States. Data are presented for all parties and candidates (as well as scattering vote) contesting elections anywhere in the nation. Original returns obtained from each state were keyed by ICPSR staff using special software, and checked extensively for error.

## CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

.....

[1] VAR 0004    [2] ICPSR STATE CODE            [3] MD=0  
                 [4] LOC 9    WIDTH 2

[5] ICPSR State Code

[6] These are the standard ICPSR State Codes used in all ICPSR data files. The first digit of this code serves as the region code. The year of entry into the Union for each state is in parentheses.

[1]   Indicates the variable. A variable number is assigned to each variable in the data collection.

- [2] Indicates the abbreviated variable name (maximum of 24 characters) used in SAS or SPSS to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.
  
- [3] Indicates the code values of missing data. In this example, code values equal to 0 are missing data (MD=0). Alternative statements for other variables are "MD=-9" or "NO MISSING DATA CODES." Some analysis software packages (including SAS and SPSS) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
  
- [4] Indicates the starting location and width of this variable when the data are stored in ascii format. In this example the variable named "ICPSR STATE CODE" is two columns wide and is located in columns 7 and 8 in each record.
  
- [5] This is the variable description, which may expand on the variable name, in some cases.
  
- [6] A comment optionally appears here in the codebook to provide explanatory information about the variable.
  
- [7] Indicates the code values occurring in the data for this variable.
  
- [8] Indicates the textual definitions of the codes.

## Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

## **ICPSR 13**

### **General Election Data for the United States, 1950-1990**

#### **Variable Description and Frequencies**

**Note:** Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
